## DETAILED ACTION

### Previous Rejections

Unless specifically repeated/maintained **infra**, all previous rejections are withdrawn.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Syudo (EP 1151751). Syudo discloses gel compositions formed by cross linking a polymer with two substances selected from magnesium aluminometasilicate ( $\text{Al}_2\text{O}_3 \bullet \text{MgO} \bullet 2\text{SiO}_2 \bullet x\text{H}_2\text{O}$ ); dried aluminum hydroxide gel ( $\text{Al}_2\text{O}_3 \bullet n\text{H}_2\text{O}$ ); and aluminum chloride, present in the gel composition from .05-5 parts by weight per 100 parts by weight of the gel (abstract and page 2, lines 29-44) said composition comprising polyacrylic acid, sodium polyacrylate (a partially neutralized polyacrylate, see product data for Viscomate, provided herein), water, and 0.01-10 parts by weight per 100 parts by weight of vitamin C or a derivative([0007]) thereof such as L-ascorbyl magnesium phosphate with pHs in the range of 5.5-8.5 ([0010]) when diluted with purified water (page 5, table 1) and further comprising a polyhydric alcohol ([0010]).

As to Applicant, claim 8, it is noted that claim 8 is a product by process claim; even though product-by-process claims are limited by and defined by the process,

Art Unit: 1612

determination of patentability is based on the product itself. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process (see MPEP 2113). In this case, Syudo disclose the gel compositions of Applicant's instant claims and therefore the process is not given patentable weight. Additionally, the reference discloses a film i.e. "cataplasms" which are spread over the skin and therefore being broadly interpreted to be a "film" and since the prior art compositions contain the same ingredients in the same relative proportions, they would inherently have the same properties (tack etc).

### ***Response to Arguments***

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. Applicant essentially makes no arguments but instead has amended claim 1 to require the presence of partially neutralized polyacrylate.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
